ABOUT ME

In my final year of studies as Software Engineer at Technological Educational Institute of Central Macedonia. Excited about software development, web development, game development and generally development technologies. Also, really interested in taking new opportunities and work as a team member. I'm looking forward to starting my career and enriching my development skills.

WORK EXPERIENCE

[09/2022 – 08/2023] **Information Technology Engineer**

Hellenic Navy

Country: Greece

-Database management: Performed database management tasks for the entire Naval base, including financial data from treasury, warehouse inventory, deliveries from external suppliers, and internal inventory transfers.

-Technical support for hardware: Provided technical support for computers, including repairs, maintenance, and troubleshooting.

-Server and rack support: Managed and maintained servers and racks.

EDUCATION AND TRAINING

[09/2018 – Present] **Computer Programming, Specific Applications**

Technological Educational Institute of Central Macedonia

City: Serres

Country: Greece

DIGITAL SKILLS

Java | PHP | HTML | CSS | MySQL | Git | Docker | Bootstrap | Spring Framework Basics

PROJECTS

[11/2022 – Present]

Bachelor Thesis - Development of an app with location awareness and augmented reality (AR) functionality

Online version of the well-known lost treasure game. More specifically, the application will consist of two parts:

- A management application where the user can create news games.
- A mobile application where players can participate in one game.

Using Java, Spring, Google Maps API, Vaadin, MySQL, Docker.

[12/2021 – Present] **Michailidis-alarms.gr**

Website development and technical support. Implementation of a web application where the client can maintain a database of their customers, manage the services they provide and view statistics and activities.

Link: <http://michailidis-alarms.gr>

[03/2022 – 05/2022] **Leave Management System**

Application developed and designed to manage the employee's leaving request for a company.

Using PHP, MySQL, Bootstrap

Link: <https://github.com/krakenhacker/leave-managment-system>

[10/2021 – 01/2022] **Back-End Development for a Music app on Android**

Using Java Spring boot framework. Tested about 60%. (Attempt for Mock Tests)
Features: Get artists information from AudioDB API.

There is a readme file with all the rest services application provides.

Link: <https://gitlab.com/brunos2021/rest>

[02/2021 – 05/2021] **Web application for photoalbums**

Using Java Servlets, HTML, CSS, MySQL, Google Maps API

Link: <https://github.com/krakenhacker/PhotoAlbum>
